

THE ENTERPRISE PLATFORM FOR FIELD MANAGEMENT

ALL-IN-ONE FIELD MANAGEMENT SOFTWARE
FOR UTILITY SERVICES, CONSTRUCTION SUPPORT,
ENERGY SERVICES AND HYDROVACUING.

ALL-IN-ONE PLATFORM

Streamline dispatch, tracking,
invoicing and reporting.

BUILT FOR YOUR INDUSTRY

Engineered for the unique
needs of field service operations.

REAL-TIME VISIBILITY

Get real-time insights to make
smarter, faster decisions.

RELIABLE & SECURE

Enterprise-grade security
you can count on.

FROM FIELD TO OFFICE

Experience seamless field operations with an AI-powered, offline-ready platform built for utilities.

Bring work tickets, safety management, compliance, and training together in one solution—accessible anywhere, even without connectivity. With smart automation and real-time insights, you'll streamline job assignments, reduce admin time, and keep crews efficient and compliant in the field.

Built for Growth

HOW WE HELP YOUR OPERATIONS.

Our customers can experience improved efficiency, and decreased costs, with a unified solution. Through our system, customers can quickly access the information they need and receive real-time updates and insights into business operations. This allows them to stay informed and be better prepared to manage jobs, trucks and crew schedules, while also reducing their expenditures.

Our system not only provides a cost-effective, user-friendly solution with built-in features and tools that make field operations management easy and efficient. Our software helps teams reduce paperwork and simplify operational data management.

All-In-One Solution

From orchestrating intricate excavation tasks to handling crew scheduling and guaranteeing adherence to safety standards, our all-in-one software is customized to support your exact operational requirements.

OFFLINE MOBILE APPLICATION

INDUSTRY
FOCUSED

Why choose NYLUS?

Rest assured with NYLUS being in the industry for **over 10 years** we are the trusted experts for utility support service companies, energy services and heavy equipment solutions. Our specialized unit scheduler is built for your needs, offering real-time tools to reassign jobs, add crews, copy tasks, and dispatch custom notifications tailored to your operations. Enhance visibility, prevent double bookings, and streamline dispatching for unparalleled productivity.

SOLUTIONS

OFFLINE - MOBILE ACCESS

NYLUS is both Android and iOS compatible and works on almost all devices. Allow your field crew to see their jobs, work tickets, safety forms/ orientation tickets, timesheets and documents, making field-to-office communication seamless. Real-time communication with full offline capabilities.

SAFETY MANAGEMENT

SAFETY MEETS EFFICIENCY: Simplify safety management and inspections while seamlessly tying safety tasks to dispatched jobs. Enables operators or technicians to report incidents immediately via mobile devices, ensuring rapid responses. NYLUS includes system notifications for keeping your team informed in real time, ensuring prompt action.

UNIT DISPATCHING

RIGHT JOB. RIGHT CREW. RIGHT TIME.

Simplify operations by combining dispatch with safety management to efficiently schedule, notify, and verify your crew. Instantly send SMS and email notifications for job assignments, track job tickets in real-time, and keep operations running smoothly with our mobile app, which works even offline effectively. Quickly assign jobs to the most suitable and available team member, reducing downtime and travel. Ensure the right person is dispatched with the proper training.

CUSTOM FORMS

WORK TICKETS

Transition smoothly with forms tailored to your needs. Our system allows you to match your original paper forms or enhance them with our 43 field types for better data capture and management.

SAFETY FORMS

NYLUS allows you to keep track of mandatory electronic safety tickets like FLRA, Haulage/Dumpsite forms, post/pre job inspection forms and DVIRs with each job on-site anytime or all customized to fit your operations, even while offline.

SUPPLEMENTARY FORMS

Sometimes you need an extra form for your jobs. This module is excellent for those seeking to gather additional information.

FROM FIELD TO OFFICE

FIELD
OPERATIONS

OPERATIONS MANAGEMENT

UTILITY SERVICES, CONSTRUCTION SUPPORT
SERVICES, ENERGY SERVICES AND HYDROVACING

1 DISPATCHING

Eliminate the confusion of whiteboards, phone calls, and manual scheduling. NYLUS Dispatching allows you to coordinate crews, equipment, and jobs in real time from one centralized platform. Instantly assign work orders, track availability, manage scheduling conflicts, and communicate updates directly to the field while improving operational visibility and response times.

2 SCHEDULING

Simplify job planning and improve operational coordination with centralized scheduling tools designed for field service operations. Easily organize upcoming work, allocate crews and equipment, manage availability, and reduce scheduling conflicts while keeping office staff and field teams aligned in real time.

3 GPS TRACKING

Gain real-time visibility into your crews, vehicles, and equipment through integrated GPS tracking directly within the NYLUS platform. Monitor live locations, improve dispatch accuracy, reduce unnecessary travel time, and keep office staff informed while increasing operational efficiency and accountability across active jobsites.

4 TIMECARDS & MOBILE PUNCH CLOCKS

Eliminate paper timesheets and streamline payroll tracking with integrated digital timecards and mobile punch clocks built directly into the NYLUS platform. Allow field crews to clock in and out from the mobile app while accurately tracking labor hours, job time, locations, and crew activity in real time.

OPERATIONS MANAGEMENT

UTILITY SERVICES, CONSTRUCTION SUPPORT
SERVICES, ENERGY SERVICES AND HYDROVACING

5 CREW MANAGEMENT

Improve workforce coordination with centralized crew management tools fully integrated within the NYLUS platform. Easily organize crew assignments, track availability, manage certifications, monitor job activity, and keep office staff and field teams connected while improving accountability and operational efficiency.

6 POOLED JOBS

Increase operational flexibility with pooled jobs accessible directly through the NYLUS mobile platform. Allow field crews to view available work, claim open jobs, and return incomplete or unassigned work back into the job pool while keeping dispatchers informed and operations moving efficiently in real time.

7 DIGITAL WORK ORDERS

Replace generic out-of-the-box forms with fully customizable digital work orders built specifically around your operations. The NYLUS platform allows you to tailor forms, workflows, approvals, fields, and job documentation to match your company's exact processes while improving field communication, accountability, and operational efficiency.

8 PROJECT MANAGEMENT

Gain complete operational visibility with integrated project management tools built directly into the NYLUS platform. Easily view jobs, safety forms, sales orders, work orders, field activity, and project documentation all from one centralized location while improving coordination, accountability, and operational oversight across active projects.

FIELD & MOBILE OPERATIONS

UTILITY SERVICES, CONSTRUCTION SUPPORT
SERVICES, ENERGY SERVICES AND HYDROVACING

9 MOBILE APP

Keep crews connected and operations moving with the NYLUS mobile app built specifically for field service environments. Available on both iOS and Android devices, the platform allows users to access jobs, complete tickets and safety forms, capture photos, signatures, present training certs, do on-call jobs, and stay connected to office operations directly from the field.

10 FIELD FORMS

Eliminate paperwork and streamline field documentation with fully customizable digital field forms integrated directly into the NYLUS platform. Capture job details, inspections, site information, signatures, photos, and operational data in real time while ensuring forms are tailored to match your company's exact workflows and requirements.

11 DIGITAL SIGNATURES

Simplify approvals and reduce paperwork with integrated digital signatures built directly into the NYLUS platform. Capture customer sign-offs, field approvals, inspections, and operational authorizations in real time from both desktop and mobile devices while keeping all documentation securely connected to the job record.

12 GEO-LOCATED PHOTOS

Improve job documentation and field accountability with geolocated photo capture integrated directly into the NYLUS platform. Allow field crews to upload site photos with automatic location tracking, helping verify work completion, support inspections, improve reporting accuracy, and maintain clear project records directly from the field.

FIELD & MOBILE OPERATIONS

UTILITY SERVICES, CONSTRUCTION SUPPORT
SERVICES, ENERGY SERVICES AND HYDROVACING

13 TIME OFF REQUEST

Simplify workforce scheduling and approval management with integrated time off requests built directly into the NYLUS platform. Allow employees to submit vacation, leave, and availability requests from both desktop and mobile devices while giving managers real-time visibility into staffing levels, scheduling impacts, and approval workflows.

14 OFFLINE ACCESS

Maintain productivity in remote and low-service environments with integrated offline access built directly into the NYLUS mobile platform. Allow field crews to continue accessing jobs, completing forms, capturing photos, and managing field activities without an internet connection, with data automatically syncing once connectivity is restored.

15 ON CALL

Increase operational flexibility with integrated on-call and self-scheduling job management built directly into the NYLUS platform. Allow employees to view available work, accept open shifts or jobs, and manage scheduling directly from the mobile app while keeping dispatchers informed and operations running efficiently in real time.

16 MOBILE DISPATCH

Streamline day-to-day field coordination with simplified mobile dispatching built directly into the NYLUS platform. Designed for smaller operations and fast-moving field teams, users can quickly assign jobs, communicate updates, and manage schedules directly from mobile devices without the complexity of large-scale dispatch systems.

SAFETY & COMPLIANCE

UTILITY SERVICES, CONSTRUCTION SUPPORT
SERVICES, ENERGY SERVICES AND HYDROVACING

17

FLHAS & HAULAGE RECORDS

Improve field safety and compliance with fully digital Field Level Hazard Assessments integrated directly into the NYLUS platform. Allow crews to complete, submit, and review. With integrated digital haulage records built directly into the NYLUS you can now accurately capture load details, dump locations, material types, timestamps, and driver activity in real time for reporting accuracy.

18

INCIDENT REPORTING

Streamline workplace incident documentation with fully digital incident reporting integrated directly into the NYLUS platform. Allow field and office staff to quickly capture incidents, injuries, near misses, photos, and supporting documentation from both desktop and mobile devices while maintaining accurate records for safety and compliance reporting.

19

TRAINING RECORDS & CERTS

Simplify employee training management with integrated training records and certification tracking built directly into the NYLUS platform. Monitor employee certifications, expiration dates, safety training, and compliance requirements in real time while receiving automated notifications to help ensure crews remain qualified and operationally ready.

20

ANALYTICS

Gain real-time visibility into workplace safety performance with integrated safety analytics built directly into the NYLUS platform. Track incidents, FLHAs, inspections, training records, compliance activity, and safety trends through centralized reporting dashboards designed to help improve accountability, reduce risk, and support proactive safety management.

SAFETY & COMPLIANCE

UTILITY SERVICES, CONSTRUCTION SUPPORT
SERVICES, ENERGY SERVICES AND HYDROVACING

21 SAFETY AUDITS

Simplify COR and internal compliance processes with integrated digital safety audits built directly into the NYLUS platform. Manage inspections, audit checklists, corrective actions, supporting documentation, and compliance tracking from one centralized system while improving accountability, audit readiness, and overall safety program management.

22 SAFETY NOTIFICATION

Improve emergency response and workplace communication with automated safety notifications built directly into the NYLUS platform. Instantly alert supervisors, safety personnel, and management when incidents, injuries, near misses, or first aid reports are submitted.

23 DOCUMENT LIBRARY

Centralize company documentation with a secure digital document library fully integrated into the NYLUS platform. Store safety manuals, procedures, policies, certifications, training documents, and operational files in one organized location while controlling user-specific access to ensure employees only view documents relevant to their role, division, or responsibilities.

24 DOCUMENT ACKNOWLEDGEMENTS

Improve compliance and accountability with integrated document acknowledgements built directly into the NYLUS platform. Track when employees review and acknowledge safety policies, procedures, training documents, and operational updates while maintaining accurate digital records for reporting and compliance purposes.

FLEET & EQUIPMENT

UTILITY SERVICES, CONSTRUCTION SUPPORT
SERVICES, ENERGY SERVICES AND HYDROVACING

25 GPS DASHBOARD

Gain real-time operational visibility with an integrated GPS dashboard connected directly through your existing GPS tracking systems. Monitor live vehicle locations, crew activity, travel routes, and equipment movement from one centralized dashboard while improving dispatch coordination, operational awareness, and overall fleet efficiency across active jobsites.

26 PREVENTIVE MAINTENANCE

Reduce downtime and improve equipment reliability with integrated GPS. Schedule jobs for unit maintenance, track service request, manage unit inspections, and monitor equipment performance while leveraging advanced GPS integrations to improve maintenance visibility, utilization tracking, and operational readiness across your fleet.

27 INSPECTIONS

Streamline unit inspections and improve fleet reliability with integrated digital inspections built directly into the NYLUS platform. Connect safety forms, unit inspections, and operational checklists directly to the maintenance dashboard while automatically notifying mechanics of issues and generating pooled maintenance jobs to help reduce downtime and improve equipment readiness.

28 EQUIPMENT UTILIZATION

Maximize fleet performance and operational efficiency with integrated equipment utilization tracking built directly into the NYLUS platform. Monitor unit activity, idle time, job usage, run hours, and equipment availability in real time while leveraging GPS integrations and operational data to improve scheduling.

FINANCE & ADMINISTRATION

UTILITY SERVICES, CONSTRUCTION SUPPORT
SERVICES, ENERGY SERVICES AND HYDROVACING

29 INVOICING

Streamline billing and reduce administrative workload with flexible invoicing solutions built directly into the NYLUS platform. Generate invoices within NYLUS or seamlessly connect with integrated accounting systems while automatically pulling job details, labor hours, equipment usage, pricing, and field documentation to improve billing accuracy and accelerate payment processing.

30 CUSTOMER PORTAL

Accelerate payments with the integrated NYLUS customer portal. Allow customers to view job activity, review invoices, and securely submit payments through credit card or ACH directly from the portal while improving transparency, reducing administrative follow-up, and enhancing the overall customer experience.

31 SALES ORDERS

Simplify quoting and job creation with integrated sales orders connected directly to customizable price books within the NYLUS platform. Quickly build accurate sales orders using predefined service rates, equipment pricing, labor costs, and customer-specific pricing structures while reducing manual entry

32 PRICEBOOKS

Eliminate manual pricing and improve billing accuracy with flexible price books fully integrated into the NYLUS platform. Create custom pricing structures for specific projects, customers, jobs, or company-wide services while automatically applying rates to sales orders, work orders, and invoices to streamline operations and reduce administrative errors.

FINANCE & ADMINISTRATION

UTILITY SERVICES, CONSTRUCTION SUPPORT
SERVICES, ENERGY SERVICES AND HYDROVACING

33 REPORTING

Gain deeper operational and financial visibility with advanced reporting tools powered by the NYLUS custom report engine. Build reports directly from your company's custom forms, workflows, job data, safety records, invoicing, and operational activity while generating tailored financial and operational insights designed around your exact business requirements.

34 ACCOUNTING INTEGRATIONS

Streamline financial workflows with seamless accounting integrations connected directly to the NYLUS platform. Automatically sync invoices, customer information, pricing, labor hours, and operational data with your accounting systems to reduce duplicate entry, improve accuracy, across your organization.

35 PAYROLL RULES ENGINE

Simplify payroll processing with a powerful payroll rules engine fully integrated into the NYLUS platform. Automatically calculate labor rules, overtime, shift differentials, travel time, union requirements, allowances, and job-specific pay structures based on your company's exact operational and payroll policies while reducing manual calculations and administrative workload.

36 APPROVALS

Improve operational control and accountability with configurable work order approvals built directly into the NYLUS platform. Create custom approval workflows for jobs, pricing, field activity while ensuring the right personnel review and authorize work orders before work progresses or billing is completed.

REPORTING & ANALYTICS

UTILITY SERVICES, CONSTRUCTION SUPPORT
SERVICES, ENERGY SERVICES AND HYDROVACING

37 REPORTING ENGINE

Generate powerful operational and financial insights with the NYLUS custom reporting engine. Build reports directly from your company's custom forms, workflows, job data, and operational activity to gain real-time visibility into the metrics that matter most to your business.

38 CUSTOM DASHBOARDS

Create fully customizable dashboards tailored to your operations with real-time visibility into payroll, invoicing, job management, pooled jobs, maintenance activity, safety reporting, and operational performance. The NYLUS platform allows each team to build dashboards around the workflows and data that matter most to their role and responsibilities.

39 KPI TRACKING

Monitor operational performance in real time with integrated KPI tracking built directly into the NYLUS platform. Track productivity, labor hours, invoicing, equipment utilization, safety performance, job progress, and operational trends through customizable dashboards designed to help improve visibility, accountability, and decision-making across your organization.

40 OPERATIONAL ANALYTICS

Gain deeper insight into your operations with advanced operational analytics built directly into the NYLUS platform. Track utilization reports, labor performance, fleet activity, job productivity, downtime, and operational trends in real time to help improve efficiency, resource planning, and overall business performance.

ADVANCED ADD-ON FEATURES (OPTIONAL)

- Advanced Payroll Rule Engine
- Advanced System Notification
- Geo - Pictures (by volume)
- Advance GPS Integration
- Accounting Integration
- KPIs and Custom Reporting Engine
- AI Assistant - *Tokens*
- Customer Portal
- API
- Job Engine Rules
- Server Back-up
- Server Load Add-On
- Dev Queue (custom work)

Add-on modules can be bundled into any plans. Mobile Offline included with every plan.

FEATURED MODULE

1 Custom Work & Safety Forms

Custom digital forms tailored to your business — not out of the box.

We don't just provide out-of-the-box forms we build custom digital forms tailored to your industry. Our solutions are designed to meet the specific needs of your business. This ensures you're not forced to adapt to a generic system — instead, you get tools built to streamline your operations and reflect the way your team actually works.

Create unlimited custom digital forms for all your field service needs—from work tickets/ LEMs, to FLHAs, JSAs, DIRs and much more.

From job service details and dumpsites to customer signatures, photos, dropdown menus, access to drawing canvas, and custom tables, every form is customized to fit your company.

Couple the price books with work tickets to simplify and accelerate the pricing process.

Connect forms to jobs, customers, divisions, or units—you're **not limited** to just one option!

FEATURED MODULE

2 Safety Management

Stay Alert, Stay Safe with NYLUS, track and training with ease.

Streamline your workplace safety program from field to office with our mobile safety forms, document management and field orientation certs. Digitize Haulage Records, CSEs, FLRAs, JSAs and Equipment Inspections while leveraging our system notifications features. Optimize your workplace safety program with NYLUS.

NYLUS includes system notifications for keeping your team informed in real-time, ensuring prompt action on workers orientation, inspections, and compliance tasks. Add notifications to a digital safety form to let you know when an incident has been reported and submitted in the field.

Streamline Compliance and Training by tracking worker training and orientation specific to jobs and sites, ensuring compliance.

Safety Document Acknowledgement is crucial for safety compliance because it ensures that all workers are fully informed. NYLUS allows you to track the length of time a user reads the document as well as having them digitally sign and acknowledge they have read it.

FEATURED MODULE

3 Payroll Rule Engine

From simple to complex payroll rules, streamline timesheets and reporting for accuracy, compliance, and time savings.

Whether the timesheet and payroll process requires simple or complex rule application, this feature streamlines processes, reduces errors, and enhances accuracy, ensuring employees pay time and rates are accurate.

Digital timesheet systems and automated reporting streamlines the payroll process.

It also can improve compliance by allowing for quick adjustments based on changing regulations or company policies, helping businesses avoid costly penalties.

Having the ability to apply pay rates and simplify or customize payroll rules offers significant benefits for businesses. It ensures flexibility to accommodate different pay structures, such as hourly rates, overtime, union rules etc. while keeping payroll management efficient.

This optimized approach saves valuable administrative time and provides a scalable solution as the business grows.

FEATURED MODULE

4 Custom Report Engine

The reporting engine is directly integrated with NYLUS digital forms.

Transform operational data into actionable insights with NYLUS's Custom Reporting Engine. Built to connect directly with our customizable digital forms, the reporting system allows companies to capture real-time field data and instantly convert it into meaningful KPI tracking, analytics, and operational reporting.

Whether data is collected through inspections, safety forms, field tickets, maintenance logs, timecards, or job workflows, the reporting engine centralizes information into a single, easy-to-read dashboard environment. Companies can build custom reports tailored to their operations, divisions, clients, or compliance requirements without relying on spreadsheets or manual data entry.

Key capabilities include:

- Real-time KPI monitoring
- Custom report creation
- Form-driven data automation
- Operational performance tracking
- Safety and compliance reporting
- Asset and maintenance analytics
- Workforce productivity insights
- Exportable and client-ready reports

FEATURED MODULE

5 Customer Pricebooks

Streamline standard or customer pricing and charges.
Flexible, automated, and precise.

The NYLUS Price Books and Charges module provides a robust solution for managing all your union and non-union pricing and charge requirements.

Customize, automate, and manage complex pricing scenarios to ensure accurate, efficient, and flexible billing.

Automate your service pricing based on specific projects, jobs, customers, or global settings, ensuring consistent and accurate billing across all scenarios.

This module supports both percentage-based and fixed charges, allowing you to handle even the most complex pricing needs directly on your work tickets.

Effortlessly add charges such as fuel fees, surcharges, or custom fees to any form with ease.

Once the pricing is finalized, all charges are seamlessly transferred to quotes and invoices, eliminating manual errors and saving valuable time.

FEATURED MODULE

8 Mobile Offline

Stay connected anywhere complete work tickets and safety forms offline and keep productivity flowing.

In the field service industry, reliability and adaptability are key to maintaining seamless operations.

All offline entries automatically sync with the system when an internet connection is restored, ensuring up-to-date records all real-time using our offline mode.

Field service teams often operate in remote or rural areas where internet connectivity is unreliable or non-existent.

Offline capabilities ensure that workers can access and complete critical tasks, such as filling out work tickets, submitting safety forms, presenting orientation certificates to site foremen or reviewing job documents, without being dependent on an active connection.

This prevents downtime, keeps projects on track, and allows teams to focus on delivering quality service regardless of location.

FEATURED MODULE

9 Time Off Management

Simplify time off tracking with NYLUS! Manage time off requests and approvals from field to office.

The Nylus Time Off Tracking module makes managing employee time off straightforward and efficient.

Employees can easily submit time off requests from on the mobile app, which are routed through customizable workflows and approvals for management review.

Managers receive instant notifications when a request is submitted and can quickly approve or deny it, triggering a notification to the user.

Pair this functionality with our time-off reports to track employee metrics and monitor individual time-off.

Set limits on time off allowances with time off definitions, ensuring balanced resource availability. Enable one or many managers to approve time off with ease!

Gain company-wide visibility into time off status using the customizable time off dashboard.

FEATURED MODULE

6 Unit & Crew Dispatching

One unified solution, from work tickets to safety management, all in one place.

Quickly assign jobs to the most suitable and available team member, reducing downtime and travel. Ensure the right person or crew is dispatched with the proper training and forms for the job.

Keep operations running smoothly in the field with our offline mobile app and minimizing errors and rework.

Experience seamless operations with our unified solution that brings work tickets and safety management together in one platform.

Streamline processes, ensure compliance, and improve efficiency by managing everything from job assignments to site specific training in a single, easy-to-use system.

NYLUS's intuitive unit dispatching & scheduling dashboard allows you to effortlessly copy or re-assign jobs to units, view trucks & dumpsite on our live maps and quickly add job site locations and contacts in real-time.

Monitor and optimize your fleet with detailed utilization reports for each unit and resource group.

BUILT FOR REAL FIELD OPERATIONS

COMMON CHALLENGES

- **MANUAL DISPATCH COORDINATION**
- **PAPER TICKETS AND FLHAS/JSA**
- **DELAYED INVOICING**
- **EQUIPMENT DOWNTIME**
- **POOR FIELD VISIBILITY**
- **SAFETY DOCUMENTATION MANAGEMENT**

HOW NYLUS HELPS

NYLUS CENTRALIZES DISPATCHING, FIELD DOCUMENTATION, SAFETY WORKFLOWS, INVOICING, AND FLEET MANAGEMENT INTO ONE OPERATIONAL PLATFORM DESIGNED SPECIFICALLY FOR YOUR OPERATIONS.

RECOMMENDED MODULES

- **DISPATCHING**
- **GPS TRACKING**

SIMPLE, SCALABLE PRICING BUILT FOR FIELD OPERATIONS

Our tier plans are designed to fit any company size and offers maximum flexibility. No per-user surprise fees just real operational value. Each plan includes offline feature, mobile access to jobs, forms, and reporting. Units, trucks and equipment are excluded from user license counts.

Let's build the right solution for your field operations! **Plans start at \$350/month. Scales by company size.**

Field Ops Solo

Up to 5 users (capped)

For solo or small 2-3 crew operations. A simple package with digital work tickets and dispatch essentials to get jobs moving quickly.

Field Ops Core

Up to 12 users , additional flex user max 3

Entry-level for small crews scaling up. Complete with dispatch, safety, timecards, and work tickets to streamline operations and cut admin overhead.

Field Ops Growth

Up to 20 users, additional flex user max 6

For expanding businesses needing deeper automation. Includes advanced modules, job cost tracking, and efficiency tools to scale operations.

Field Ops Teams

Up to 30 users, additional flex user max 9

For operations focused on compliance and efficiency. Built to streamline dispatch, enforce safety processes, and scale with your crews.

Field Ops Pro

Up to 50 users, additional flex user max 20

For multi-division companies that need advanced logic, approvals, and deeper customization across multiple crews and locations.

Optional GPS and Accounting Integrations can be added to any NYLUS plan as a configurable upgrade.

ENTERPRISE PACKAGES ARE PRICED IN TIERS AND ON A CASE-BY-CASE BASIS TO REFLECT UNIQUE OPERATIONAL NEEDS. INCLUDES CUSTOM DEVELOPMENT PRIORITY, ENTERPRISE INTEGRATIONS, AND DEDICATED SLA COVERAGE

Field Ops Enterprise

Custom bulk tiered
pricing

70 - 2000+ users

Tailored for organizations with expanding teams, multi-division structures, or advanced workflow needs—at a cost that grows with you.

Who Enterprise is For

- Large Utility Companies managing staff across multiple divisions.
- Regional & National Operators scaling into new markets.
- Organizations with Compliance Needs requiring audit-ready systems and data security.
- Companies Seeking Customization beyond out-of-the-box features.

Benefits of Field Ops Enterprise:

Scalable User Pricing

- Scale without limits while unlocking bulk pricing efficiencies that deliver greater value as your business expands.

Multi-Division & Advanced Logic

- Manage multiple branches, business units, or regions in a single system. Customize approvals, workflows, and dispatch logic.

Custom Dashboards & Reporting

- Build executive dashboards, compliance metrics, and project KPIs to gain full operational visibility.

Integration & API Access

- Connect with accounting, payroll, fleet management, and CRM systems. Custom integrations available with SLA-backed support.

Priority Support & SLAs

- Direct access to our enterprise support team with guaranteed response times and service-level agreements.

Tailored Implementation

- Dedicated project managers and solution architects ensure smooth onboarding, customization, and long-term optimization.
